PROJECT MOTORCYCLES AT SARH (CHAD)

Communities in southern Chad are quite numerous but often distant from each other. Local community guides play an important role and require constant support, visits, and updates. In order to optimize this important service, the national council of ministries has decided to divide the communities into areas, assigning specific counselors the responsibility for each zone. However, most of them must travel to the communities using taxi-brousse and often continue on foot for days.

To address this challenge, SOS Third World has decided to contribute to a significant portion of the purchase of 5 motorcycles at a price of 1,200 euros each. This investment aims to improve the efficiency of the service provided by the counselors (zone coordinators) and supervisors, also taking their safety and health into consideration.

Thanks to this valuable contribution, area supervisors will be able to conduct visits to the communities with greater efficiency and regularity, thus facilitating their important mission. They express infinite gratitude to the donors.
